## Projects

---

### Pawster – A Crowd Sourced Pet Kenneling Website [Live Link](#) [GitHub](#)

#### Front-end Role

- Full-stack application utilizing libraries such as Redux, Tailwind, HeadlessUI.
- Back-end written in Node/Apollo with GraphQL API endpoints using data from MongoDB managed by mongoose ODM.
- Wrote logic to retrieve information from the database to manipulate data.
- Integrated Stripe API for payment processing.

### Lefties – Food Service Application [Live Link](#) [GitHub](#)

#### Full-stack Role

- Food service application that allows users to sell leftovers
- Full-stack project writing in React using Redux.
- Google Maps and Places API integrated to show users who have listings active.
- The back-end was writing in Node.js/Express using Sequelize to manage the database endpoints

### Cams – E-commerce Website [Live Link](#) [GitHub](#)

#### Full-stack Role

- An E-commerce clone that allows users to sell their camera goods and other related electronics.
- Back-end focused project that was built using Node.js/Express servers, using Handlebars as a template for the front-end.
- Wrote all of the logic that manipulates the data from the database: filtering, login/registration, adding new products.

## Work Experience

---

### Tech-Select – Assistant Manager

August 2014 - January 2018

- Managed employees to receive and ship orders (over 2-3 million dollars of product monthly).
- Log daily, weekly, monthly profits within Excel spreadsheets and provide data for analyzing.
